I have a problem...

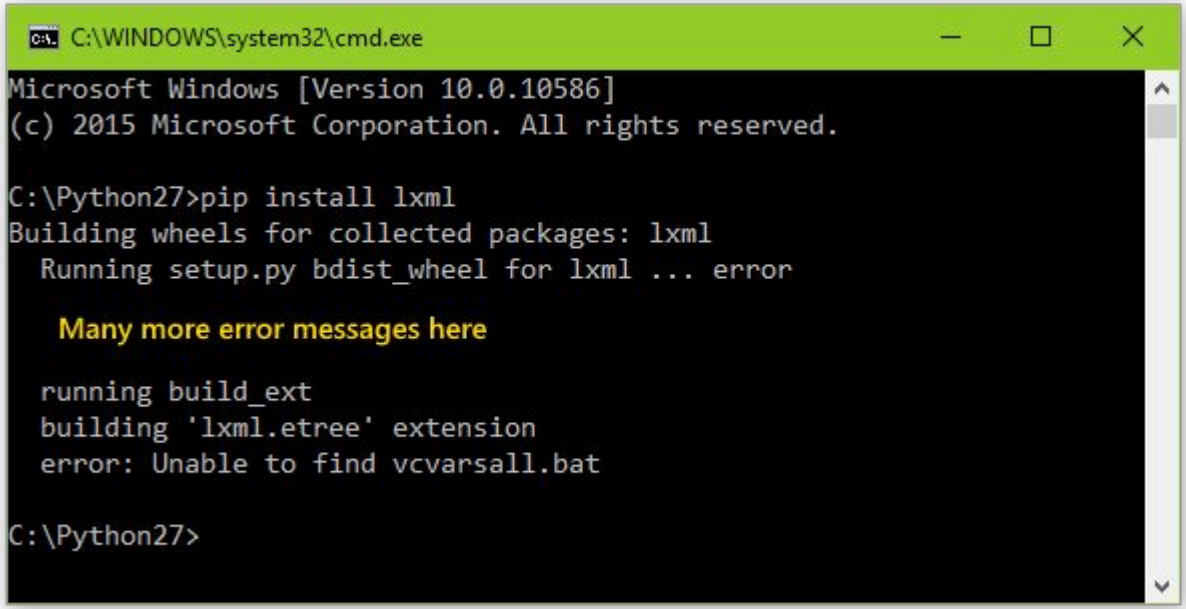

Figure from and real solution to this problem can be found in an excellent blog post: https://blogs.msdn.microsoft.com/pythonengineering/2016/04/11/unable-to-find-vcvarsall-bat/

BUILD IT FROM SOURCE
THEY SAID
IT'LL BE FUN THEY
SAID
memegenerator.net

All I really want is:

An easy method for installing **binary** packages.

All I really want is:

An easy method for installing **binary** packages.

and

That is **cross platform**, does not require **root/admin**, and just **works.**

All I really want is:

An easy method for installing **binary** packages.

and

That is **cross platform**, does not require **root/admin**, and just **works.**

and

I want to know how those packages were **built** and be able to **reproduce** them.

All I really want is:

An easy method for installing **binary** packages.

and

That is **cross platform**, does not require **root/admin**, and just **works.**

and

I want to know how those packages were **built** and be able to **reproduce** them.

and

A method for created **isolated environments** with **all** my dependencies.

conda

- Cross-platform package manager
- Environment manager
- Open source, BSD license
- Does not require admin/root
- Designed for any software, but with Python-specific enhancements
- Created by Continuum Analytics

conda-forge

- a community led collection of **recipes**, **build infrastructure** and **packages**.
- 805 packages, 150 contributors
- **open** and **transparent,** meeting notes and discussion on GitHub.
- recipes are stored in GitHub "feedstock" repositories
- builds done on CI systems; Travis CI, Circle CI, AppVeyor
- Packages uploaded to the **conda-forge** channel on Anaconda.org

Install packages using:

```
conda install -c conda-forge altair
```
